

Drilling Machine Safety Exercise

MD&TE

Safety exercise: identify the hazards on and around the drilling machine

Study the illustration above and:

- identify the hazards on and around the drilling machine
- list the hazards and explain the risks
- state how you would eliminate each of the risks
- write a safety rule for each of the hazards.
- draw the safety signs that you believe should be displayed on or near the drilling machine
- identify machines in your school workshop that have clutter around them and take action to remove the hazards and reduce or eliminate the risks.
